RESEARCH INTERESTS

I am broadly interested in all aspects of global sustainability, the persistence of species, and, in particular, the efficacy of current ocean management in the face of climate impacts under uncertain climate futures. I am currently undertaking a **PhD** at the University of the Sunshine Coast to 1) identify **climate refugia** within Australia's current **marine protected areas**, 2) find corridors of **climate connectivity**, and 3) explore alternative marine protected area configurations that may be more **robust to long-term climate impacts**.

My most recent role within QLD Fisheries focused on developing qualitative and quantitative **Ecological Risk Assessments** for commercial fisheries throughout QLD. I served as an active member of the **Scientific Advisory Group** in developing Stock Assessments for Black and White Teatfish in QLD, and have authored chapters in **Status of Australian Fish Stocks** reports.

I am interested in **postdoc** opportunities abroad, within the field of **quantitative marine ecology**, particularly to continue exploring cross-jurisdictional **climate-smart ocean management** through global collaboration, to work towards **sustainability** on all ecological fronts.

EDUCATION

University of the Sunshine Coast

Doctor of Philosophy

2022–2025

"Climate-smart marine protected area networks in Australia."

Advisors: A/Prof. Kylie L. Scales (UniSC), Prof. David S. Schoeman (UniSC),
Prof. Anthony J. Richardson (UQ)

The University of Technology, Sydney

Bachelor of Science, Marine Biology

2012–2014

Research Project: *"Independent and combined effects of temperature and salinity on an estuarine species, Enoplosus armatus, endemic to Australia: Implications of a changing climate."*

Advisor: Prof. David Booth

INDUSTRY EXPERIENCE

Fisheries Resource Officer – Ecological Risk Assessments

2020–2022

Queensland Department of Agriculture and Fisheries

Supervisors: Dr. Ian Jacobsen, Dr. Peter Kind

Senior Fisheries Technician – Research

2018–2020

New South Wales Department Of Primary Industries (Fisheries)

Supervisors: Dr. John Stewart, Dr. Daniel Johnson

Fisheries Technician – Port Monitoring

2015–2018

New South Wales Department Of Primary Industries (Fisheries)

Supervisors: Dr. John Stewart, Anne-Marie Hegarty, Caitlin Young

Research Assistant – Shark mitigation technology

2016–2018

University of Technology, Sydney

Supervisor: Prof. William Gladstone

Laboratory Assistant
National Measurement Institute, Sydney
Supervisor: Gavin Stevenson

2015–2016

Laboratory and Field Assistant
University of Technology, Sydney
Supervisor: Dr. Antonia Bramwell

2013–2015

PUBLICATIONS

Peer-reviewed papers

PROFESSIONAL ENGAGEMENT AND ACHIEVEMENTS

Conferences and Presentations

International Marine Conservation Congress (IMCC7) (Cape Town, ZA) <i>Presentation</i>	2024
Australian Marine Sciences Association (AMSA) (Hobart, AUS) <i>Presentation, Session Convener</i>	2024
Australian Marine Sciences Association (AMSA) (Cairns, AUS) <i>Poster</i>	2022
3-Minute Thesis (University of the Sunshine Coast) <i>"Choose your future!"</i>	2024
Animal Form, Function, and Evolution (University of the Sunshine Coast) - <i>Lecture</i> <i>"Biodiversity redistribution under climate change: Implications for marine protected areas"</i>	2023
Animal Ecology Seminar (University of the Sunshine Coast) <i>"Climate-smart marine protected areas in Australia"</i>	2023

Teaching

Co-supervisor, Honours (University of the Sunshine Coast) <i>"Projected climate velocity on Australia's east coast"</i>	2025–2026
Global Change Ecology (University of the Sunshine Coast) <i>Lecturer, Teaching Assistant</i>	2025
Stats With Teeth: Understanding Ecological Data (University of the Sunshine Coast) <i>Teaching Assistant, Relief Teacher</i>	2022–2025
Fish Dissection Laboratory Workshops (NSW DPI Fisheries) <i>Workshop design, presentation, dissections, and engagement in citizen science for schools</i>	2016
Principles of Scientific Practice (University of Technology, Sydney) <i>Primary contact for cohort; Demonstrator for tutorial and practical sessions</i>	2015

Awards

HDR Student of the Year (University of the Sunshine Coast)	2024
--	------

ADDITIONAL TRAINING AND EXPERIENCE

Qualifications and Short Courses

R Workshop (University of Queensland)	2021–2025
State Emergency Services Community Member (Queensland)	2025
General Purpose Hand (Deckhand) Licence	2019

Research Skills

Data-based

Programming languages: R, LaTeX

Statistical and functional programming, visualisation (*tidyverse*, *purrr*, *furrr*, *terra*, *ncdf4*, *tmap*)

Use of Earth System Models in projections of ocean climate (*hotrstuff*, *VoCC*, *heatwaver*)

Field and Laboratory

Fish ageing and otolith chemistry

Data visualisation and analysis, AgeLength Key compilation in R

Boat-based field work: planning, organisation, vessel maintenance

Offshore artificial reef monitoring, shark capture and tagging, BRUVS

PFAS contamination tissue sampling

Electrofishing and freshwater species identification
